## ***Robichaud High School***

Welcome to Robichaud High School, a great place to work and learn. Robichaud is committed to graduating students that are college and career ready. We realize high school graduates must be prepared to succeed at the next level, whether they choose to attend college or begin a career. The goal of Robichaud High School is to prepare graduates for life after high school by teaching them the skills and knowledge that are essential to college and workforce training readiness.

Robichaud offers a comprehensive college preparatory curriculum designed to address student interests while still meeting Michigan High School Graduation Requirements. Among the various specialty courses at Robichaud, students have the option of participating in the Project Lead the Way program (PLTW). PLTW provides a comprehensive curriculum for engineering that includes hands-on, project-based engineering courses that engage students on multiple levels, expose them to areas of study that they typically do not pursue, and provide them with a foundation and proven path to college and career success. Additionally, Robichaud High School students have the opportunity to pursue dual enrollment opportunities by taking on-site college courses through which they can earn up to 12 college credits. Advanced Placement and vocational courses are also available to Robichaud students.

Not only do we have a rigorous academic program, but Robichaud also offers outstanding opportunities in athletics and extracurricular activities. Robichaud is dedicated to providing a quality educational program that meets the intellectual, physical, and social needs of all students.

We invite you to explore our school website. It contains information to connect you to valuable notices, events, and resources offered at Robichaud. Thank you for visiting our website. I welcome you to visit our school for a personal tour.

Sincerely,

*Kelli Cunningham*
